

2010

Delaware County Household Hazardous Waste (HHW) Collection Events

Household products containing toxic chemicals can be a threat to people and the environment, if improperly discarded. Never dispose of hazardous materials in the trash as they may harm your sanitation workers or result in a collection vehicle fire. It is also not safe to pour them down a sink or storm drain as they end up in the environment polluting the air, water, and soil.

Think Globally, Act Locally!

Preventing waste in the first place is the best, least expensive method of disposal. With regard to paint, we recommend you follow the options below:

Reduce

Buy only what you need and return unopened cans.

Reuse

Use leftover paint for a second coat.

Recycle

Latex Paints can be blended together to produce beige or gray.

Oil-based paints may also be mixed together; however, *Do Not Mix Oil-Based with Latex Paints.*

.....

This Program is a community service to the residents of Delaware County and is **not open to businesses, institutions or industry.**
